

How AI money circulates

Evidence as of 3 October 2026 | Stock prices: 2 October 2026

Saved research snapshot, not live market data. Company-wide accounts and mixed reporting periods. Conditional analysis is not a forecast of stock returns.

Reading the circulation map

Scope: all tiers; current ledger filters. 11 case studies and 59 ledger links.

Tier 1: model labs and major cloud providers. Tier 2: compute operators, hardware and direct suppliers. Tier 3: manufacturing enablers, power, sites, contractors and project financing. Cases include upstream links when needed for context.

Relationships are based on named counterparties in primary sources. Some describe an established supplier route without a disclosed invoice or payment.

Paid investments, outstanding borrowing, signed commitments, frameworks, conditional guarantees and recognized revenue retain separate labels. No aggregate capital-flow total is calculated.

The same dollar is not traced through the system. Interdependence can amplify a spending shock, but is not proof of fictitious revenue.

No total circular-dollar figure is calculated. Investments, guarantees, facilities, purchase commitments, receivables and recognized revenues are different, overlapping measures. Closed relationship paths do not prove the same cash recycled.

Tier 1: Investor, cloud vendor and revenue-share recipient

Tier 1: Investor, cloud vendor and revenue-share recipient

Microsoft finances OpenAI; OpenAI buys Azure services and generates reported Microsoft revenue.

Classification: documented reciprocal relationships

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. Microsoft -> OpenAI

Strategic investment. \$13B committed; \$11.9B funded. Status: partly funded.

Funding reported through June 30, 2026. Equity ownership is not cloud revenue.

[Microsoft FY2026 Form 10-K, OpenAI related-party disclosure](https://www.sec.gov/Archives/edgar/data/789019/000119312526323660/msft-20260630.htm)

<https://www.sec.gov/Archives/edgar/data/789019/000119312526323660/msft-20260630.htm>

2. OpenAI -> Microsoft

Azure services. \$250B incremental commitment. Status: committed.

October 2025 commitment, not cash paid. April 2026 terms permit all OpenAI products on other clouds; capped OpenAI-to-Microsoft revenue share continues through 2030.

[Microsoft-OpenAI partnership amendment](https://blogs.microsoft.com/blog/2025/10/28/the-next-chapter-of-the-microsoft-openai-partnership/)

<https://blogs.microsoft.com/blog/2025/10/28/the-next-chapter-of-the-microsoft-openai-partnership/>

[Microsoft-OpenAI April 2026 amendment](https://blogs.microsoft.com/blog/2026/04/27/the-next-phase-of-the-microsoft-openai-partnership/)

<https://blogs.microsoft.com/blog/2026/04/27/the-next-phase-of-the-microsoft-openai-partnership/>

3. OpenAI -> Microsoft

Actual related-party revenue. \$24.1B FY2026 revenue. Status: recognized.

Includes commercial arrangements and revenue sharing; \$6B receivable at June 30. Revenue is not proof of cash collection and is not incremental to all other contract figures.

[Microsoft FY2026 Form 10-K, OpenAI related-party disclosure](https://www.sec.gov/Archives/edgar/data/789019/000119312526323660/msft-20260630.htm)

<https://www.sec.gov/Archives/edgar/data/789019/000119312526323660/msft-20260630.htm>

Interpretation and boundary

Interpretation and boundary

Separate contracted demand, recognized revenue and receivables. Growth financed by new capital can be real, yet remains sensitive to the lab's eventual cash generation.

No tracing of identical dollars. Microsoft's investment valuation is not investment cash, and recognized revenue is not profit.

Tier 1: Funding customers of your own cloud

Amazon funds both OpenAI and Anthropic while both commit to long-term AWS capacity.

Classification: documented reciprocal relationships

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. Amazon / AWS -> OpenAI

OpenAI preferred stock. \$50B funded. Status: funded.

\$28.7B invested by June 30; remaining \$21.3B funded after quarter-end, disclosed in Q2 filing.

[Amazon Q2 2026 Form 10-Q, non-marketable investments](https://www.sec.gov/Archives/edgar/data/1018724/000101872426000026/amzn-20260630.htm)

<https://www.sec.gov/Archives/edgar/data/1018724/000101872426000026/amzn-20260630.htm>

2. OpenAI -> Amazon / AWS

AWS capacity expansion. \$100B expansion over 8 years. Status: committed.

Incremental to prior \$38B arrangement; includes roughly 2 GW Trainium. Contract value is not annual revenue or current payment.

[OpenAI-Amazon strategic partnership](https://openai.com/index/amazon-partnership/)

<https://openai.com/index/amazon-partnership/>

3. Amazon / AWS -> Anthropic

Anthropic investment history. \$18B invested through June 2026. Status: funded.

3. Amazon / AWS -> Anthropic

\$8B historical convertible notes plus \$10B preferred stock in Q2. Instrument conversions and valuation gains are not additional cash.

[Amazon Q2 2026 Form 10-Q, non-marketable investments](#)

<https://www.sec.gov/Archives/edgar/data/1018724/000101872426000026/amzn-20260630.htm>

4. Amazon / AWS -> Anthropic

Compute-linked financing. \$15B remaining facility. Status: conditional facility.

Original \$20B capacity reduced by \$5B Series H purchase. Further availability depends on compute-delivery milestones; draws may be convertible notes or stock.

[Amazon Q2 2026 Form 10-Q, non-marketable investments](#)

<https://www.sec.gov/Archives/edgar/data/1018724/000101872426000026/amzn-20260630.htm>

5. Anthropic -> Amazon / AWS

AWS compute agreement. >\$100B over 10 years. Status: committed.

Expanded Trainium and Graviton capacity agreement. Delivery and chip-performance obligations matter; not recognized AWS revenue.

[Amazon-Anthropic expanded collaboration](#)

<https://www.aboutamazon.com/news/company-news/amazon-invests-additional-5-billion-anthropic-ai>

Interpretation and boundary

The commercial and financing exposures can weaken together if AI customers cannot cover compute costs from external demand.

Different horizons and instruments; no valid single 'circulating dollars' total. Deliveries, conditions and funding milestones differ.

Tier 1: Two investors, one NVIDIA-powered cloud route

Tier 1: Two investors, one NVIDIA-powered cloud route

Microsoft and NVIDIA back Anthropic, which contracts Azure capacity on NVIDIA systems.

Classification: conditional triangle

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. Microsoft -> Anthropic

Anthropic equity commitment. Up to \$5B. Status: announced commitment.

Announced commitment. Anthropic's February Series G includes a portion of the previously announced Microsoft/NVIDIA investments; do not add both headlines.

[Microsoft, NVIDIA and Anthropic partnership](https://blogs.nvidia.com/blog/microsoft-nvidia-anthropic-announce-partnership/)

<https://blogs.nvidia.com/blog/microsoft-nvidia-anthropic-announce-partnership/>

[Anthropic Series G financing](https://www.anthropic.com/news/anthropic-raises-30-billion-series-g-funding-380-billion-post-money-valuation)

<https://www.anthropic.com/news/anthropic-raises-30-billion-series-g-funding-380-billion-post-money-valuation>

2. NVIDIA -> Anthropic

Anthropic equity commitment. Up to \$10B. Status: announced commitment.

Announced commitment; paid amount not established here. The Series G partly overlaps this commitment.

[Microsoft, NVIDIA and Anthropic partnership](https://blogs.nvidia.com/blog/microsoft-nvidia-anthropic-announce-partnership/)

<https://blogs.nvidia.com/blog/microsoft-nvidia-anthropic-announce-partnership/>

[Anthropic Series G financing](https://www.anthropic.com/news/anthropic-raises-30-billion-series-g-funding-380-billion-post-money-valuation)

<https://www.anthropic.com/news/anthropic-raises-30-billion-series-g-funding-380-billion-post-money-valuation>

3. Anthropic -> Microsoft

Claude on Azure. \$30B compute commitment. Status: committed.

Azure service purchase commitment, with additional capacity up to 1 GW. NVIDIA systems support this deployment; purchase dollars for hardware are undisclosed.

3. Anthropic -> Microsoft

[Microsoft, NVIDIA and Anthropic partnership](#)<https://blogs.nvidia.com/blog/microsoft-nvidia-anthropic-announce-partnership/>**Interpretation and boundary**

One relationship supports model funding, cloud demand and accelerator demand. Hardware capacity alone does not reveal NVIDIA's transaction revenue.

The supplier leg is documented technologically but not monetarily sized; Anthropic's other chip platforms diversify dependence.

Tier 2: Supplier, shareholder and buyer of spare capacity

NVIDIA sells GPUs, invests in CoreWeave and backstops qualifying spare cloud capacity. Contract-backed loans finance deployment.

Classification: documented reciprocal relationships

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. NVIDIA -> CoreWeave

CoreWeave stock purchase. \$2B cash. Status: funded.

Completed January 23: 22,935,780 Class A shares at \$87.20. Equity issuance cash, not revenue.

[CoreWeave January 2026 securities purchase 8-K](#)<https://www.sec.gov/Archives/edgar/data/1769628/000176962826000044/crwv-20260123.htm>[CoreWeave 8-K: completed NVIDIA equity sale](#)<https://www.sec.gov/Archives/edgar/data/1769628/000176962826000044/crwv-20260123.htm>**2. NVIDIA -> CoreWeave**

Residual cloud capacity. \$6.3B initial order value. Status: conditional obligation.

NVIDIA must buy qualifying unsold capacity through April 13, 2032, subject to delivery, availability and termination terms. Not an unconditional \$6.3B cash transfer.

2. NVIDIA -> CoreWeave

[CoreWeave NVIDIA residual-capacity 8-K](#)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crww-20250909.htm>

[CoreWeave 8-K: NVIDIA residual-capacity purchase agreement](#)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crww-20250909.htm>

3. CoreWeave -> NVIDIA

GPU infrastructure purchases. Amount undisclosed. Status: supplier relationship.

CoreWeave filing identifies NVIDIA as GPU supplier and shareholder. Direct versus OEM-mediated purchase mix and transaction dollars are not quantified here.

[CoreWeave NVIDIA residual-capacity 8-K](#)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crww-20250909.htm>

4. OpenAI -> CoreWeave

Model training and inference. Up to ~\$22.4B combined contracts. Status: committed.

Total includes March \$11.9B, May \$4B and September \$6.5B agreements; do not sum the total with its components. Not current-year revenue.

[CoreWeave expands OpenAI contracts to approximately \\$22.4B](#)

<https://www.coreweave.com/news/coreweave-expands-agreement-with-openai-by-up-to-6-5b>

5. CoreWeave financing consortium -> CoreWeave

GPU and contract-backed loan. \$8.5B facility; ~\$7.5B initially available. Status: facility closed.

DDTL 4.0 secured by infrastructure and customer contract; maturity March 2032. Drawn amount is not stated. MUFG/Morgan Stanley structure; Blackstone anchors.

[CoreWeave DDTL 4.0 financing facility](#)

<https://investors.coreweave.com/news/news-details/2026/CoreWeave-Closes-Landmark-8-5-Billion-Financing-Facility-Achieving-First-Investment-Grade-Rated-GPU-backed-Financing/default.aspx>

[CoreWeave closes \\$8.5 billion DDTL 4.0 financing facility](#)

<https://investors.coreweave.com/news/news-details/2026/CoreWeave-Closes-Landmark-8-5-Billion-Financing-Facility-Achieving-First-Investment-Grade-Rated-GPU-backed-Financing/default.aspx>

Interpretation and boundary

The key test is third-party utilization versus vendor support, alongside interest, GPU life, collateral and delivery obligations.

Backstop value is conditional and cannot be added to equity, debt capacity or customer contract values as current sales.

Tier 2: A hyperscaler contract becomes financing capacity

Tier 2: A hyperscaler contract becomes financing capacity

Microsoft contracts capacity; NVIDIA provides capital and hardware; lenders advance against deployed GPUs and customer cash flows.

Classification: documented funding chain

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. Microsoft -> Nebius

Dedicated GPU capacity. Original \$17.4B; optional ~\$19.4B. Status: committed.

September 2025 contract through 2031, conditional on deployment and availability. Original disclosed values shown; later option exercise not verified here.

[Nebius September 2025 6-K, Microsoft contract](https://assets.nebius.com/assets/86625727-9e66-46c1-af79-c27d57434e3c/25-25580-1_Nebius%2520Group%2520N.V._6-K.pdf%3Fcache-buster=2025-09-08T21:23:09.625Z)

https://assets.nebius.com/assets/86625727-9e66-46c1-af79-c27d57434e3c/25-25580-1_Nebius%2520Group%2520N.V._6-K.pdf%3Fcache-buster=2025-09-08T21:23:09.625Z

2. NVIDIA -> Nebius

Pre-funded share warrant. Approximately \$2B proceeds. Status: funded.

Nebius reports sale of a pre-funded Class A share warrant to NVIDIA; distinct from payment for GPU hardware.

[Nebius FY2025 Form 20-F, NVIDIA warrant proceeds](https://www.sec.gov/Archives/edgar/data/1513845/000110465926052948/nbis-20251231x20f.htm)

<https://www.sec.gov/Archives/edgar/data/1513845/000110465926052948/nbis-20251231x20f.htm>

3. Nebius -> NVIDIA

NVIDIA cloud platform. Dollar value undisclosed. Status: supplier relationship.

Nebius already deploys NVIDIA hardware; partnership targets more than 5 GW by end-2030. This target is not a purchase order or recognized revenue.

[NVIDIA-Nebius full-stack cloud partnership](https://nebius.com/newsroom/nvidia-and-nebius-partner-to-scale-full-stack-ai-cloud)

<https://nebius.com/newsroom/nvidia-and-nebius-partner-to-scale-full-stack-ai-cloud>

4. Nebius secured lenders -> Nebius

4. Nebius secured lenders -> Nebius

Monetizing installed GPU contracts. Approximately \$775M facility. Status: facility signed.

Secured by deployed GPUs and contracted customer cash flows; SOFR+2.5%, maturity October 2030. Source does not identify this facility's customer; do not assume Microsoft.

[Nebius \\$775M secured debt financing](#)

<https://nebius.com/newsroom/nebius-raises-775-million-in-first-secured-debt-financing-to-accelerate-global-buildout>

Interpretation and boundary

Customer commitments can finance expansion into new enterprise workloads. Watch how much growth relies on deposits, refinancing and a few creditworthy buyers.

The named Microsoft contract and July secured loan are not proven to be the same collateral pool. This is a financing chain, not a proven closed loop.

Tier 3: Chip supplier underwrites the infrastructure tenant

NVIDIA's SB Energy guarantee supports OpenAI's future campus leases and an overwhelmingly NVIDIA-based site.

Classification: Contingent credit-support chain

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. NVIDIA -> OpenAI

OpenAI financing round. \$30B announced investment. Status: announced commitment.

Part of February round, later closed as committed capital. Individual funding timing not established here; do not add the earlier \$100B letter-of-intent headline.

[OpenAI February 2026 financing and NVIDIA capacity](#)

<https://openai.com/index/scaling-ai-for-everyone/>

[OpenAI closes \\$122B committed-capital round](#)

<https://openai.com/index/accelerating-the-next-phase-ai/>

2. NVIDIA -> SB Energy

2. NVIDIA -> SB Energy

Credit support for OpenAI leases. Up to \$105B exposure. Status: contingent.

August guarantee covers defined lease/power obligations for ~4.25 GW. Tenant defaults trigger payment; phases expected from FY2029. This is not cash spent, drawn debt or revenue.

[NVIDIA Q2 FY2027 10-Q, SB Energy guarantees](#)

<https://www.sec.gov/Archives/edgar/data/1045810/000104581026000075/nvda-20260726.htm>

3. OpenAI -> SB Energy

PORTS campus leases. 20-year leases; total payments undisclosed. Status: future obligation.

OpenAI affiliate is tenant. NVIDIA guarantee only covers defined portions; its \$105B cap is not the total lease price.

[NVIDIA Q2 FY2027 10-Q, SB Energy guarantees](#)

<https://www.sec.gov/Archives/edgar/data/1045810/000104581026000075/nvda-20260726.htm>

Interpretation and boundary

Credit support can unlock physical construction before tenant cash flows mature. The supplier gains deployment opportunities while accepting long-lived contingent risk.

Ohio and Oracle projects are separate routes, not one contract. Guarantees are contingent exposure, not money already transferred.

Tier 2: Vendor financing -> GPU cloud -> hardware -> vendor

Tier 2: Vendor financing -> GPU cloud -> hardware -> vendor

NVIDIA supplies equity and a conditional capacity backstop while CoreWeave builds an NVIDIA-based cloud, including Dell racks. Lenders convert assets and contracts into funding. Vendor revenue, equity, and total contract values are different accounting objects; summing them overstates final demand. CoreWeave also reports financing from unnamed equipment and software vendors.

Classification: Investment, capacity and vendor credit

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. NVIDIA -> CoreWeave

CoreWeave stock purchase. \$2B cash. Status: funded.

Completed January 23: 22,935,780 Class A shares at \$87.20. Equity issuance cash, not revenue.

[CoreWeave January 2026 securities purchase 8-K](https://www.sec.gov/Archives/edgar/data/1769628/000176962826000044/crwv-20260123.htm)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962826000044/crwv-20260123.htm>

[CoreWeave 8-K: completed NVIDIA equity sale](https://www.sec.gov/Archives/edgar/data/1769628/000176962826000044/crwv-20260123.htm)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962826000044/crwv-20260123.htm>

2. NVIDIA -> CoreWeave

Residual cloud capacity. \$6.3B initial order value. Status: conditional obligation.

NVIDIA must buy qualifying unsold capacity through April 13, 2032, subject to delivery, availability and termination terms. Not an unconditional \$6.3B cash transfer.

[CoreWeave NVIDIA residual-capacity 8-K](https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crwv-20250909.htm)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crwv-20250909.htm>

[CoreWeave 8-K: NVIDIA residual-capacity purchase agreement](https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crwv-20250909.htm)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962825000047/crwv-20250909.htm>

3. CoreWeave -> Dell Technologies

AI rack procurement. Value undisclosed. Status: delivered unquantified.

3. CoreWeave -> Dell Technologies

Dell delivered GB300 NVL72 integrated racks to CoreWeave. Shipment confirmed; payment amount and date undisclosed. Do not add its full server value to NVIDIA component revenue.

[Dell delivers NVIDIA GB300 NVL72 racks to CoreWeave](https://www.dell.com/en-us/blog/dell-delivers-market-s-first-nvidia-gb300-nvl72-to-coreweave/)

<https://www.dell.com/en-us/blog/dell-delivers-market-s-first-nvidia-gb300-nvl72-to-coreweave/>

4. Dell Technologies -> NVIDIA

NVIDIA content in Dell racks. Undisclosed. Status: unquantified.

Dell racks delivered to CoreWeave contain NVIDIA GPUs and CPUs. Economic component route; this source does not disclose the invoice entity or direct Dell-to-NVIDIA cash payment.

[Dell delivers NVIDIA GB300 NVL72 racks to CoreWeave](https://www.dell.com/en-us/blog/dell-delivers-market-s-first-nvidia-gb300-nvl72-to-coreweave/)

<https://www.dell.com/en-us/blog/dell-delivers-market-s-first-nvidia-gb300-nvl72-to-coreweave/>

5. CoreWeave financing consortium -> CoreWeave

GPU and contract-backed loan. \$8.5B facility; ~\$7.5B initially available. Status: facility closed.

DDTL 4.0 secured by infrastructure and customer contract; maturity March 2032. Drawn amount is not stated. MUFG/Morgan Stanley structure; Blackstone anchors.

[CoreWeave DDTL 4.0 financing facility](https://investors.coreweave.com/news/news-details/2026/CoreWeave-Closes-Landmark-8-5-Billion-Financing-Facility-Achieving-First-Investment-Grade-Rated-GPU-backed-Financing/default.aspx)

<https://investors.coreweave.com/news/news-details/2026/CoreWeave-Closes-Landmark-8-5-Billion-Financing-Facility-Achieving-First-Investment-Grade-Rated-GPU-backed-Financing/default.aspx>

[CoreWeave closes \\$8.5 billion DDTL 4.0 financing facility](https://investors.coreweave.com/news/news-details/2026/CoreWeave-Closes-Landmark-8-5-Billion-Financing-Facility-Achieving-First-Investment-Grade-Rated-GPU-backed-Financing/default.aspx)

<https://investors.coreweave.com/news/news-details/2026/CoreWeave-Closes-Landmark-8-5-Billion-Financing-Facility-Achieving-First-Investment-Grade-Rated-GPU-backed-Financing/default.aspx>

6. OEM / software financing providers (undisclosed) -> CoreWeave

Equipment and software credit. \$5.102B outstanding at 30 Jun 2026. Status: outstanding balance.

CoreWeave reports OEM and software-license financing of \$4.220B recourse and \$0.882B non-recourse. A stock of outstanding debt, not new cash raised in this period. Providers are unnamed; do not assign this financing to Dell, NVIDIA or a named vendor.

[CoreWeave Q2 2026 10-Q, Note 10: OEM and software-license financing](https://www.sec.gov/Archives/edgar/data/1769628/000176962826000366/crwv-20260630.htm)

<https://www.sec.gov/Archives/edgar/data/1769628/000176962826000366/crwv-20260630.htm>

Interpretation and boundary

Watch: Operating cash generated from customers unaffiliated with equipment vendors; Cash actually drawn versus facility headline; Capacity utilization, GPU resale value and debt amortization; Revenue earned versus remaining contractual backlog.

Supplier, investor, customer and collateral exposure can correlate; this does not by itself establish fraudulent round-tripping.

Tier 3: Chip revenue -> foundry -> tools and construction

Tier 3: Chip revenue -> foundry -> tools and construction

AI equipment demand reaches memory, fabrication, packaging, tools and fab construction. The named relationships are evidence of economic exposure. They do not reveal what fraction of a particular cloud contract each supplier captures.

Classification: Supplier cascade; no closed loop proved

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. NVIDIA -> TSMC

Wafer fabrication. Undisclosed. Status: existing unquantified.

NVIDIA identifies TSMC as a wafer foundry. Supplier relationship disclosed; bilateral spend and AI-only allocation undisclosed.

[NVIDIA FY2026 sustainability report, page 19: named suppliers](#)

<https://images.nvidia.com/aem-dam/Solutions/documents/NVIDIA-Sustainability-Report-Fiscal-Year-2026.pdf>

2. TSMC -> ASML

Fab equipment. Undisclosed. Status: existing unquantified.

TSMC names ASML among its award-winning suppliers. Relationship verified, but the award gives no order value or AI-specific revenue allocation.

[TSMC 2025 supply-chain awards: named equipment and construction suppliers](#)

<https://pr.tsmc.com/english/news/3274>

3. TSMC -> Applied Materials

Fab equipment. Undisclosed. Status: existing unquantified.

TSMC names Applied Materials among its award-winning suppliers. Relationship verified, but the award gives no order value or AI-specific revenue allocation.

[TSMC 2025 supply-chain awards: named equipment and construction suppliers](#)

<https://pr.tsmc.com/english/news/3274>

4. TSMC -> Onto Innovation

4. TSMC -> Onto Innovation

Fab metrology. Undisclosed. Status: existing unquantified.

TSMC names Onto Innovation among its award-winning suppliers. Relationship verified, but the award gives no order value or AI-specific revenue allocation.

[TSMC 2025 supply-chain awards: named equipment and construction suppliers](#)

<https://pr.tsmc.com/english/news/3274>

5. NVIDIA -> Micron

Memory purchases. Undisclosed. Status: existing unquantified.

NVIDIA identifies Micron as a memory supplier. Supplier relationship disclosed; bilateral spend and AI-only allocation undisclosed.

[NVIDIA FY2026 sustainability report, page 19: named suppliers](#)

<https://images.nvidia.com/aem-dam/Solutions/documents/NVIDIA-Sustainability-Report-Fiscal-Year-2026.pdf>

6. NVIDIA -> Fabrinet

Assembly, testing and packaging. Undisclosed. Status: existing unquantified.

NVIDIA identifies Fabrinet as a manufacturing subcontractor. Supplier relationship disclosed; bilateral spend and AI-only allocation undisclosed.

[NVIDIA FY2026 sustainability report, page 19: named suppliers](#)

<https://images.nvidia.com/aem-dam/Solutions/documents/NVIDIA-Sustainability-Report-Fiscal-Year-2026.pdf>

Interpretation and boundary

Watch: Foundry capacity utilization and customer prepayments; Equipment backlog conversion, cancellations and cash collection; HBM capacity additions versus realized prices; Customer concentration and export controls.

Downstream revenue can grow before the ultimate AI service earns an acceptable return.

Tier 3: Cloud procurement -> fuel cells -> shares back to the customer

Tier 3: Cloud procurement -> fuel cells -> shares back to the customer

Bloom's Oracle arrangement includes both equipment deployment and a cashlessly exercised share incentive. Project financing can place a capital provider between the cloud customer and equipment vendor. This is an economic feedback link, not proof that the identical cash was recycled.

Classification: Non-cash commercial feedback

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. Oracle -> Bloom Energy

On-site fuel-cell procurement. 1.2 GW contracted; up to 2.8 GW framework. Status: contracted partly deploying.

Oracle's framework covers up to 2.8 GW, including an initial contracted 1.2 GW. Dollar price undisclosed. Bloom's filing calls Oracle a customer's customer, so project owners can mediate payment.

[Bloom: Oracle 1.2 GW contracted, 2.8 GW procurement framework](#)

<https://www.bloomenergy.com/news/bloom-energy-and-oracle-expand-strategic-partnership-to-deploy-up-to-2-8-gw-to-accelerate-ai-infrastructure-build-out/>

[Bloom Q2 2026 10-Q: Oracle cashless warrant exercise and revenue accounting](#)

<https://www.sec.gov/Archives/edgar/data/1664703/000162828026050325/be-20260630.htm>

2. Bloom Energy -> Oracle

Customer equity incentive. \$324.4M fair value; no cash paid. Status: issued cashless.

Oracle cashlessly exercised Bloom's warrant on May 1; Bloom also issued inducement shares. Shares, not cash financing. Bloom records consideration to a customer's customer as revenue reductions as systems ship. Do not add this fair value to cash circulation.

[Bloom Q2 2026 10-Q: Oracle cashless warrant exercise and revenue accounting](#)

<https://www.sec.gov/Archives/edgar/data/1664703/000162828026050325/be-20260630.htm>

3. Brookfield group / managed funds -> Brookfield-Bloom power projects

Fuel-cell project capital. Up to \$25B framework. Status: framework.

Brookfield increased its framework to finance Bloom-based AI power projects from \$5B to \$25B. Not \$25B invested in

3. Brookfield group / managed funds -> Brookfield-Bloom power projects

Bloom shares, paid to Bloom, or all committed to specific projects.

[Brookfield/Bloom financing framework increased to \\$25 billion](#)

<https://www.bloomenergy.com/news/brookfield-and-bloom-energy-expand-ai-infrastructure-partnership/>

4. Brookfield-Bloom power projects -> Bloom Energy

Equipment purchases. Undisclosed. Status: framework projects.

The Brookfield framework finances power projects deploying Bloom fuel cells. Economic project-to-vendor route; individual contracts and revenue recognition schedules are not disclosed in this announcement.

[Brookfield/Bloom financing framework increased to \\$25 billion](#)

<https://www.bloomenergy.com/news/brookfield-and-bloom-energy-expand-ai-infrastructure-partnership/>

Interpretation and boundary

Watch: Revenue reductions from customer consideration; Equipment versus service margin and replacement obligations; Project-level debt, ownership and power-purchase terms; Signed projects versus broad capital frameworks.

Equity incentives and headline financing frameworks can make headline demand look larger than near-term, independent cash receipts.

Tier 3: AI cloud -> project developer -> debt, tax equity and fuel cells

Nebius-related power deployment brings together a lead developer, minority equity, tax equity, bank debt and Bloom equipment. The \$1.7B headline describes the project financing package, not four separate investments or all Bloom revenue.

Classification: Project financing chain

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. Nebius -> Bloom Energy

Dedicated fuel-cell power. 328 MW initially planned. Status: announced agreement.

Nebius selected Bloom for an initial 328 MW installation planned for 2026. Project financing intermediates the cash path; do not assume Nebius directly prepays equipment.

1. Nebius -> Bloom Energy

[Nebius/Bloom agreement for 328 MW initial deployment](#)

<https://nebius.com/newsroom/nebius-and-bloom-energy-partner-to-power-ai-infrastructure-build-out>

2. Industrial Development Funding -> IDF-led Nebius power project

Lead developer. Share of \$1.7B project total undisclosed. Status: announced financing.

IDF leads the Nebius dedicated-power project. Do not assign the full \$1.7B announced project investment to each participant.

[IDF issuer release: \\$1.7 billion Nebius power project financing roles](#)

<https://www.prnewswire.com/news-releases/industrial-development-funding-and-oaktree-announce-1-7-billion-project-investment-in-bloom-energy-fuel-cells-for-nebius-ai-in-frastructure-build-out-302827566.html>

3. Oaktree-managed capital -> IDF-led Nebius power project

Minority project equity. Share of \$1.7B project total undisclosed. Status: announced financing.

Oaktree supplies minority project equity. Do not assign the full \$1.7B announced project investment to each participant.

[IDF issuer release: \\$1.7 billion Nebius power project financing roles](#)

<https://www.prnewswire.com/news-releases/industrial-development-funding-and-oaktree-announce-1-7-billion-project-investment-in-bloom-energy-fuel-cells-for-nebius-ai-in-frastructure-build-out-302827566.html>

4. Morgan Stanley -> IDF-led Nebius power project

Tax equity. Share of \$1.7B project total undisclosed. Status: announced financing.

Morgan Stanley is the sole tax-equity investor and placement agent. Do not assign the full \$1.7B announced project investment to each participant.

[IDF issuer release: \\$1.7 billion Nebius power project financing roles](#)

<https://www.prnewswire.com/news-releases/industrial-development-funding-and-oaktree-announce-1-7-billion-project-investment-in-bloom-energy-fuel-cells-for-nebius-ai-in-frastructure-build-out-302827566.html>

5. MUFG Bank -> IDF-led Nebius power project

Senior project debt. Share of \$1.7B project total undisclosed. Status: announced financing.

MUFG Bank provides senior project debt. Do not assign the full \$1.7B announced project investment to each participant.

[IDF issuer release: \\$1.7 billion Nebius power project financing roles](#)

<https://www.prnewswire.com/news-releases/industrial-development-funding-and-oaktree-announce-1-7-billion-project-investment-in-bloom-energy-fuel-cells-for-nebius-ai-in-frastructure-build-out-302827566.html>

6. IDF-led Nebius power project -> Bloom Energy

Power equipment deployment. Equipment payment undisclosed; \$1.7B whole-project financing. Status: announced project.

The \$1.7B financing package supports Bloom fuel-cell deployment dedicated to Nebius. Exact equipment consideration and cash paid to Bloom undisclosed.

[IDF issuer release: \\$1.7 billion Nebius power project financing roles](#)

<https://www.prnewswire.com/news-releases/industrial-development-funding-and-oaktree-announce-1-7-billion-project-investment-in-bloom-energy-fuel-cells-for-nebius-ai-in-frastructure-build-out-302827566.html>

Interpretation and boundary

Watch: Project completion and power availability; Who owns assets and bears fuel-price and outage risk; PPA tenor and credit support from the cloud tenant; Interest coverage after maintenance and service obligations.

Financing can accelerate deployment but also moves risk into SPVs, leases and long-term power contracts.

Tier 3: Cloud and utility spending reaches sites and local contractors

Tier 3: Cloud and utility spending reaches sites and local contractors

A cloud tenant supports long-duration data-center rent, which helps finance property buildout. Utility spending reaches named local engineers and contractors. These are additional recipients of AI-linked expenditure, not automatically financial loops.

Classification: Supply-chain spending into local work

Direction of funding, commercial spend or non-cash value. Equal-width arrows; amounts and status are listed below.

1. CoreWeave -> Core Scientific

Data-center colocation. \$10B+ revenue potential over contract terms. Status: contracted partly operating.

Core Scientific reports 590 MW contracted to CoreWeave, with over 430 MW billing by mid-July 2026. Not cash received to date. Take-or-pay contracts include escalators; customer funds capex, power and utilities. Do not count capex credits twice.

[Core Scientific Q2 2026 investor presentation](https://www.sec.gov/Archives/edgar/data/1839341/000183934126000012/q2fy26earningsdeck728am.htm)

<https://www.sec.gov/Archives/edgar/data/1839341/000183934126000012/q2fy26earningsdeck728am.htm>

2. CoreWeave -> Galaxy Digital

Helios data-center lease. 15-year lease; value not used. Status: contracted partly operating.

Galaxy delivered 133 MW of critical IT load to CoreWeave under a 15-year lease. Delivery status July 2026; no implied full lifetime rent already paid.

[Galaxy completes Helios Phase I for CoreWeave](https://www.galaxy.com/newsroom/galaxy-completes-phase-i-of-its-helios-data-center-campus)

<https://www.galaxy.com/newsroom/galaxy-completes-phase-i-of-its-helios-data-center-campus>

3. Deutsche Bank -> Galaxy Digital

Helios project debt. \$1.4B facility; \$1.1B drawn at 31 Mar 2026. Status: drawn partly.

Deutsche Bank credit agreement provides a \$1.4B facility; Galaxy disclosed \$1.1B drawn at March 31, 2026. Facility borrower is Galaxy Helios I LLC. Deutsche Bank is contractual counterparty, not necessarily sole economic lender; current outstanding balance may differ.

3. Deutsche Bank -> Galaxy Digital

[Galaxy SEC prospectus, Q1 2026 financing disclosure](https://www.sec.gov/Archives/edgar/data/1859392/000162828026032994/a424b3-decemberresalesx1q1.htm)

<https://www.sec.gov/Archives/edgar/data/1859392/000162828026032994/a424b3-decemberresalesx1q1.htm>

[Galaxy closes \\$1.4 billion Helios project facility](https://www.galaxy.com/newsroom/galaxy-closes-helios-project-financing)

<https://www.galaxy.com/newsroom/galaxy-closes-helios-project-financing>

4. Meta Platforms -> Entergy

Power and grid costs. Undisclosed. Status: contracted unquantified.

Meta says it pays energy costs for its Richland Parish data center supplied with Entergy support. Do not equate total data-center investment with Entergy revenue; no bilateral cash total established here.

[Meta Richland Parish data-center page: energy cost responsibility](https://datacenters.atmeta.com/richland-parish-data-center/)

<https://datacenters.atmeta.com/richland-parish-data-center/>

5. Entergy -> Chain Electric

Construction-power upgrades. Undisclosed. Status: work completed.

Chain Electric is a named contractor on Entergy's completed Meta construction-power upgrades. Entergy reported about \$3M paid to Louisiana contract partners collectively; individual allocation undisclosed. Do not assign \$3M to each contractor.

[Entergy: completed Meta construction-power upgrades and local payments](https://www.entergy.com/news/entergy-louisiana-supports-metas-new-data-center-with-infrastructure-upgrades-in-richland-parish)

<https://www.entergy.com/news/entergy-louisiana-supports-metas-new-data-center-with-infrastructure-upgrades-in-richland-parish>

6. Entergy -> Hunt, Guillot and Associates

Construction-power upgrades. Undisclosed. Status: work completed.

Hunt, Guillot and Associates is a named contractor on Entergy's completed Meta construction-power upgrades. Entergy reported about \$3M paid to Louisiana contract partners collectively; individual allocation undisclosed. Do not assign \$3M to each contractor.

[Entergy: completed Meta construction-power upgrades and local payments](https://www.entergy.com/news/entergy-louisiana-supports-metas-new-data-center-with-infrastructure-upgrades-in-richland-parish)

<https://www.entergy.com/news/entergy-louisiana-supports-metas-new-data-center-with-infrastructure-upgrades-in-richland-parish>

Interpretation and boundary

Watch: Prepayments, rent credits and actual billed capacity; Lease duration versus tenant/customer contract duration; Construction cost overruns and power permits; Parent guarantees versus project-only recourse.

A landlord's contracted rent is only as strong as delivery conditions and tenant credit; local construction revenue may be one-off.
